

Kristiine Youth Center

Kristiine Youth Center is a small and cozy youth center, where youngsters aged 7-26 can come in their free time and enjoy different activities from cooking to e-sport. We provide a wide range of educational and recreational processes that develop young people in various ways. We help young people become a part of the society by engaging them in their own environment using their own interests, by teaching them social skills and by using knowledge learned from formal education. It is important how we are raising a new generation. In Kristiine Youth Center youngsters can participate in different kinds of activities, events, workshops and clubs. Working with different kids everyday will help you gain new skills and knowledge. As a youth worker, every work day is different.

Volunteer profile:

A volunteer should be an open-minded, friendly, active and tolerant person, who can easily make contact with youngsters (and if needed then also support them.)

It would be nice if a volunteer also has some kind of hobby that he/she can introduce to youngsters and according to that hobby can plan activities in our youth center. The only thing we see that volunteer should do is run the international movie club activities, which we have a long history of. Good English is required.
